## Hardware Design Engineer

📞 0353123920 @ [homanhtinh9201@gmail.com](mailto:homanhtinh9201@gmail.com) [🔗 homanhtinh9201.github.io/portfolio/](https://github.com/homanhtinh9201)  
📍 Ho Chi Minh City 📅 02/11/1997

### SUMMARY

Hardware Design Engineer with 6 years of experience in developing reliable products for a wide range of applications. Proficient in multilayer, high-density PCB design, high-speed circuits, and wireless communications. Core competencies include design, testing and validation, manufacturing and assembly management, and team leadership.

### EDUCATION

Electronic and Communication Engineering Technology

**Industrial University of Ho Chi Minh City**

📅 2015 - 2019

### EXPERIENCE

Hardware Design Engineer

**HBQ Technology**

📅 12/2019 - Present

- Participated in hardware design for products in the fields of IoT, industrial systems, embedded devices, and automotive functional test equipment.
- Analyzed project requirements, proposed technical solutions, and selected appropriate components.
- Created system block diagrams and optimized designs for manufacturability (DFM) and cost efficiency.
- Verified hardware designs, managed Gerber files and BOMs, coordinated with PCB assembly manufacturers.
- Prepared manufacturing documentation, test procedures, and quality inspection guidelines.
- Experienced in low-power circuit design and wireless communications for IoT applications, including BLE, 4G, GPS, Wi-Fi, LoRa, and Zigbee.
- Experienced with standard industrial communication protocols such as RS485, RS422, CAN, 4–20mA, and 0–10 V.
- Experienced with microprocessors/microcontrollers and interfaces including SPI, I<sup>2</sup>C, UART.
- Experienced in designing carrier boards for SoM, SoC, including high-speed designs with memory, PCIe, MIPI, USB 3.0, HDMI, and Ethernet.

### SKILLS

|                  |                 |                 |                  |                           |
|------------------|-----------------|-----------------|------------------|---------------------------|
| Schematic        | Layout PCB      | High-Speed      | Signal Integrity | High Density Interconnect |
| Power Management | RF and wireless | Altium Designer |                  |                           |

### STRENGTHS

|                                                                                                                                                                                                                                                                     |                                                                                                                                                                                                                                    |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
|  <b>Adaptability</b><br>Successfully adapted to changing project requirements and tight deadlines, ensuring timely completion of tasks.                                           |  <b>Collaboration</b><br>Collaborated effectively with cross-functional team members to achieve project goals and deliver high-quality designs. |
|  <b>Problem Solving</b><br>Utilized analytical and critical thinking skills to identify and resolve complex circuit design challenges, resulting in improved product performance. |                                                                                                                                                                                                                                    |
